## 1. Using BNF write the syntax definitions of the following objects:

b) Unsigned integer (0, 1, 2, 3, ...). The answer:

a) Natural number (1, 2, 3, ...). The answer:

 $\langle unsigned\ integer \rangle \qquad ::= 0 \mid \langle non-zero\ digit \rangle \ \langle digits \rangle$ 

 $\langle \mathit{digits} \rangle \hspace{1.5cm} ::= \langle \mathit{digit} \rangle \hspace{0.1cm} | \hspace{0.1cm} \langle \mathit{digits} \rangle \hspace{0.1cm} \langle \mathit{digit} \rangle$ 

 $\langle digit \rangle$  ::= 0 |  $\langle non\text{-}zero\ digit \rangle$ 

 $\langle non\text{-}zero\ digit \rangle ::= 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9$ 

c) Integer (..., -2, -1, 0, 1, 2, ...). The answer:

 $\langle integer \rangle$  ::=  $\langle sign \rangle$   $\langle unsigned\ integer \rangle$ 

 $\langle sign \rangle$  ::= + | - |  $\langle empty \rangle$ 

 $\langle empty \rangle$  ::=

 $\langle unsigned\ integer \rangle ::= 0 \mid \langle non-zero\ digit \rangle \langle digit \rangle$ 

 $\langle \mathit{digits} \rangle \hspace{1.5cm} ::= \langle \mathit{digit} \rangle \hspace{0.1cm} | \hspace{0.1cm} \langle \mathit{digits} \rangle \hspace{0.1cm} \langle \mathit{digit} \rangle$ 

 $\langle digit \rangle$  ::= 0 |  $\langle non\text{-}zero\ digit \rangle$ 

 $\langle non\text{-}zero\ digit \rangle$  ::= 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9
